

Please do not prohibit sat radio from distributing traffic and weather. I spend a great deal of time in my car and if it were not for a dedicated station to traffic, I would be:

- 1) Missing time with my family
- 2) Being less productive at work, due to increased time in the car
- 3) Spending more time in stop and go traffic causing lower gas mileage and higher emission of greenhouse gases.
- 4) Be really ticked off at my elected officials for caving to the interests of media behemoths such as Clear Channel and Viacom and Infinity.

-Jeremy Vannatta
